

FULL STACK DEVELOPER / PROJECT MANAGER / QUALITY MANAGER/ MECHANICAL ENGINEERING/ COMPLIANCE ASSURANCE MANAGER / TAEM MANAGEMENT

SUMMARY

As a Full-stack Developer, I relish in having the opportunity to collaborate and learn from industry leaders whilst pushing the boundaries in web development.

I am an extremely passionate and highly motivated team player with a desire for success. Throughout my career, I have built and developed a wealth of skills and experience in a wide range of areas from but not limited to leadership, project management, communication, problem-solving, quality compliance, and decision making, earning a Certificate in Full Stack Development from Sydney University and a Diploma in Mechanical Engineering from the Royal Australian Navy.

I pride myself on building rapport throughout the team and fostering collaborative working relationships across all business lines to ensure business directives are met.

I also take pride in having a professional attitude and maintaining a positive outlook, whilst immersing and committing myself 100% in everything I do in the workplace.

WORK COMPETENCIES

Leadership

Throughout my career, I have been privileged to exercise leadership of multi-skilled teams across a range of business functions. My role as leader encompassed responsibility for the performance, development, and administration of diverse teams, and involved working under pressure to meet deadlines in challenging circumstances. I have worked in appointments where I was regularly required to make independent assessments and decisions.

Commercial Acumen

Management experience gained across a range of Defence businesses has allowed me to develop strong all-round leadership, strategy, and execution skills. The development of my general business skills has been refined in busy work environments where it was necessary to adapt readily to changes in technology. I have been directly responsible for communicating the business plan to the team, developing strategies for achieving business goals, and monitoring results against key performance indicators to ensure plans were being achieved.

Teamwork & Interpersonal

In all appointments, I have been required to act as both leader and team member. These experiences have deepened my awareness of group dynamics and methods of dealing with conflict. The ability to work both as a member of a team and autonomously is essential in an organization with the many semi-independent and interdependent units that companies have. I have worked in teams of varying sizes and have always enjoyed a good rapport with them, both at work and socially.

Communication Skills

As a manager with the Australian Defence Force, both my written and spoken communication skills are required to be of a very good standard. I have developed an ability to communicate effectively on a wide variety of topics. Also, I have been trained in report writing and delivering presentations in many settings. I have also undertaken training in presentation skills, negotiation skills, and listening skills for customer service.

Resource Management

My managerial experience in Defence has given me an excellent opportunity to develop skills in the area of Human Resource Management. I was trained and have experience in succession planning, career development, personnel administration, recruitment, and selection. In addition to formal qualifications in resource management gained through numerous management and promotion courses, I have extensive practical experience in managing physical resources.
